

## IMPORTANT SAFETY INSTRUCTIONS

When using electrical appliances, especially when children are present, basic safety precautions should always be taken, including the following:

**READ ALL INSTRUCTIONS BEFORE USING.  
KEEP AWAY FROM WATER.**

**DANGER** — Any appliance is electrically live even when the switch is off. To reduce the risk of death or injury by electric shock:

1. Always unplug appliance immediately after using.
2. Do not use while bathing or in the shower.
3. Do not place or store appliance where it can fall or be pulled into a tub or sink.
4. Do not place in, or drop into, water or other liquid.
5. If an appliance falls into water, unplug it immediately. **Do not reach into the water.**

**WARNING** — To reduce the risk of burns, electrocution, fire, or injury to persons:

1. This appliance should never be left unattended when plugged in.

2. This appliance should not be used by, on, or near children or individuals with certain disabilities.
3. Use this appliance only for its intended

use as described in this manual. Do not use attachments not recommended by the manufacturer.

4. Never operate this appliance if it has a damaged cord or plug, if it is not working properly, if it has been dropped, damaged, or dropped into water. Return the appliance to place of purchase for examination and repair.
5. Keep the cord away from heated surfaces. **Do not pull, twist, or wrap line cord around dryer.**

18.

- This appliance was set at the factory to operate at 125 volts. Refer to Additional Information section of this manual for conversion to 250 volts operation.
17. Be sure dual voltage selector is in correct voltage position before operating. Before plugging in, read the information about dual voltage contained in this instruction section of this manual.

perform the following test: The purpose of this test is to allow you to make sure the exclusive water sensing system (ALCI) is working.

1. Plug in hair dryer and press test button on plug (see appropriate diagram).
2. Hair dryer will stop working. There will be an audible click and reset button will pop out.
3. To reset ALCI with a reset button: Unit should be unplugged. Then push reset button in, and reinsert plug into outlet.

**DRYING BASICS**

1. Shampoo and condition hair with products of your choice. Rinse thoroughly. Towel-blot hair to remove excess moisture. Section hair. Using the dryer along with your styling brush, direct hot air through one section of hair at a time. Move dryer steadily across each section frequently for damage. **Stop use immediately if damage is visible or unit stops or operates intermittently.**

2. Keep dryer's air intake vents unobstructed and free from hair while drying.

3. To avoid overdrying and possible damage to hair or skin, do not concentrate heat on one section for any length of time. Keep dryer moving as you style.

4. For quick touch-ups between shampoos, dampen hair with a mist of water before styling with the dryer.

5. It is important that if immersion occurs, this unit be brought to a service center. Do not try to reset.

6. Be sure to repeat test every time you use hair dryer to confirm ALCI is operational.

7. Should the dryer go off and the ALCI reset button pop up during use, this could indicate a malfunction in the dryer. Remove plug from outlet and allow the dryer to cool. Push the reset button in and reinsert plug into outlet. Dryer should function normally. If not, return it to a Babyliss Pro Service Center for examination and repair.

**SUPER STYLING GUIDE**

Your best looks begin with a good haircut that's well maintained. Always treat hair well with superior quality shampoos, conditioners, and finishing products.

## SAVE THESE INSTRUCTIONS OPERATING INSTRUCTIONS

This appliance is intended for professional use. Use on Alternating Current (60 hertz) only. Standard dryers are designed to operate at 110-125 or 220-250 volts A.C.

This appliance has a polarized plug (one blade is wider than the other). As a safety feature, this plug will fit into a polarized outlet only one way. If the plug does not fit fully into the outlet, reverse the plug. If it still does not fit, contact a qualified electrician. Do not attempt to defeat this safety feature.

### CHECK ALCI SAFETY FEATURE EVERY TIME YOU USE DRYER.

This hair dryer is equipped with an Appliance Leakage Circuit Interrupter (ALCI), a safety feature that renders it inoperable under some abnormal conditions, such as immersion in water.

To make sure the ALCI is functioning properly,

NEVER allow the power supply cord to be pulled, twisted, or severely bent. Never wrap the cord tightly around the dryer. Damage will occur at the high flex point of entry into the dryer, causing it to rupture and short circuit. Inspect the cord frequently for damage. **Stop use immediately if damage is visible or unit stops or operates intermittently.**

Your local electrician can help you decide which type is best for you — a portable unit that plugs into the electrical outlet or a permanent unit installed by your electrician. The National Electrical Code now requires GFCIs in the bathrooms, garages, and outdoor outlets of all new homes.

If the cord or dryer is damaged or does not operate properly, return it for repair to place of purchase or an authorized Babyliss Pro service representative only. No repairs should be attempted by the consumer.

**STRAIGHTENING**

Work with hair in sections when creating a super straight look. Using a large round brush (approximately 2" in diameter), hold hair taut in each section and bend ends slightly under as you dry.

**MAKING WAVES**

Tousled, natural-looking waves are easily created by grasping hair at the roots and scrunching between fingertips while drying.

**TOURMALINE TITANIUM TECHNOLOGY**

Your Tourmaline Titanium dryer has many benefits. Titanium is an exceptional conductor of heat and is stable in ultra-high temperatures. The Titanium technology uses micro particles of titanium that provide the ultimate heat performance for beautiful, healthy hair results. Titanium yields maximum far-infrared heat — penetrating the hair from within for gentle drying without damage.

Titanium emits negative ions in their most beneficial form for faster drying, locking in hair's own natural moisture. This Tourmaline Titanium dryer will give your hair a smooth, silky shine while eliminating frizz.

For 110-125 Volt Operation

Flick the dual voltage switch to the 125 position. In this position, the dryer has two settings. It provides two speeds and two heats—low speed and low heat on LO and high speed and high heat on HI.

For 220-250 Volt Operation

Flick the dual voltage switch to the 250 position. In this position, the dryer has two settings. It provides two speeds and two heats — low speed and low heat on LO and high speed and high heat on HI.

**IF YOU MUST USE YOUR HAIR DRYER IN THE BATHROOM, INSTALL A GFCI\* NOW!**

NEVER allow the power supply cord to be pulled, twisted, or severely bent. Never wrap the cord tightly around the dryer. Damage will occur at the high flex point of entry into the dryer, causing it to rupture and short circuit. Inspect the cord frequently for damage. **Stop use immediately if damage is visible or unit stops or operates intermittently.**

Your local electrician can help you decide which type is best for you — a portable unit that plugs into the electrical outlet or a permanent unit installed by your electrician. The National Electrical Code now requires GFCIs in the bathrooms, garages, and outdoor outlets of all new homes.

If the cord or dryer is damaged or does not operate properly, return it for repair to place of purchase or an authorized Babyliss Pro service representative only. No repairs should be attempted by the consumer.

## MEDIDAS DE SEGURIDAD IMPORTANTES

Siempre que use aparatos eléctricos, especialmente en la presencia de niños, debe tomar precauciones básicas de seguridad, entre las cuales las siguientes:

**LEA TODAS LAS INSTRUCCIONES ANTES DE USARLO  
MANTÉNGALO ALEJADO DEL AGUA**

## PELIGRO —

Cualquier aparato enchufado permanece bajo tensión, aunque esté apagado. Para reducir el riesgo de muerte o herida por descarga:

1. Siempre desconecte el aparato inmediatamente después de usarlo.
2. No lo use en el baño o la ducha.
3. No coloque ni guarde el aparato donde pueda caer o ser empujado a una bañera o un lavabo.
4. No coloque el aparato ni lo deje caer al agua u otro líquido.
5. Si el aparato cayera al agua, desconéctelo inmediatamente. **No toque el agua.**

## ADVERTENCIA —

Para reducir el riesgo de quemaduras, electrocución, incendio o heridas:

1. Nunca deje el aparato desatendido mientras esté conectado.
2. Este aparato no debería ser usado por, sobre o cerca de niños o personas con alguna discapacidad.

3. Utilice este aparato únicamente con el propósito para el cual fue diseñado y solamente según las instrucciones. Sólo use accesorios recomendados por el fabricante.

4. **No opere este aparato si el cordón o la clavija estuviesen dañados, después de que hubiese funcionado mal o que se hubiese caído o si estuviese dañado.** Regrese el aparato a un centro de servicio autorizado para su revisión, reparación o ajuste.

5. Mantenga el cable alejado de superficies calientes. **No jale, retuerza ni enrolle el cable alrededor del aparato.**

6. Nunca bloquee las aberturas de aire ni coloque el aparato en una superficie blanda, como una cama o un sofá, donde se puedan obstruir. Mantenga las aberturas libres de pelusas, cabellos y elementos similares.

7. Nunca utilice este aparato mientras esté dormido/a o adormilado/a.

8. Nunca deje caer ni inserte un objeto en ninguna de las aberturas o en el tubo de aire.

9. No lo utilice en exteriores, ni lo haga funcionar donde se estén usando productos en aerosol (spray) o donde se esté administrando oxígeno.

10. No utilice una extensión con este aparato.

11. No dirija el aire caliente hacia los ojos u otras áreas sensibles al calor.

12. **Las rejillas y los accesorios pueden volverse muy calientes durante el uso. Permita que enfrien antes de manipularlos.**

13. No coloque el aparato en ninguna superficie mientras esté funcionando.

14. Mantenga su cabello alejado del aparato y de las aberturas de aire mientras esté funcionando.

15. Para prolongar la vida útil del aparato, mantenga el filtro de aire libre de cabellos, polvo y elementos similares.

16. No utilice este aparato con un convertidor de voltaje.

17. Asegúrese que el selector de voltaje esté en la posición correcta antes de encender el aparato. Lea la información relativa al doble voltaje antes de conectar el aparato al tomacorriente.

18. El selector de voltaje fue puesto en la posición "125" por el fabricante, para uso en red de 125 voltios. La sección "Información Adicional" de este manual le explicará como ajustar el voltaje para uso en red de 250 voltios.

Este aparato fue diseñado para uso profesional. Úselo solamente con Corriente Alterna (60 hertzios). Los secadores estándares están diseñados para funcionar con Corriente Alterna de 110-125 ó 220-250 voltios.

Este aparato tiene una clavija polarizada (un polo es más ancho que otro). Como medida de seguridad, se podrá enchufar de una sola manera en la toma de corriente polarizada. Si no entra por completo, invírtela. Si aún no entra completamente, llame a un electricista calificado. No intente vencer esta función de seguridad.

## PRUEBE EL CORTACIRCUITO DE SEGURIDAD ANTES DE CADA USO

Este aparato está dotado de un cortacircuito de seguridad llamado ALCI (Appliance Leakage Circuit Interrupter), que apaga el aparato inmediatamente si éste cayera al agua. Haga la prueba siguiente para asegurarse que el sistema de detección de agua funcione correctamente:

1. Enchufe el aparato y apriete el botón de prueba (véase el gráfico más abajo).

2. El aparato dejará de funcionar, se oirá un clic y el botón de reajuste saltará.

3. Para reajustarlo, desconecte el aparato, apriete el botón de reajuste luego vuelva a conectar el aparato.

4. Si el cortacircuito de seguridad no funciona correctamente, regrese el aparato a un centro de servicio autorizado.

5. Si el aparato cayera al agua, es muy importante que lo mande a un centro de servicio autorizado. No intente reajustarlo.

6. Pruebe el cortacircuito de seguridad antes de cada uso para asegurarse que esté operativo. Si el secador se apagara y el botón de reajuste saltara durante el uso, esto podría indicar un mal funcionamiento. Si esto ocurriera, desconecte el aparato, permita que enfrie y conéctelo otra vez. El aparato debería funcionar normalmente. Si no fuera el caso, regreselo a un centro de servicio autorizado para que lo revisen y lo reparen.

## TECNOLOGÍA TOURMALINE TITANIUM

Su Secador Tourmaline Titanium brinda muchas ventajas. El Titánio es un excelente conductor del calor que permanece estable en temperaturas muy altas. La tecnología del titanio utiliza micro-partículas de titanio para lograr un desempeño óptimo y dejar el cabello hermoso y saludable. El titanio emite calor infrarrojo lejano que penetra profundamente en el tallo del pelo para secar el cabello desde adentro, sin lastimarlo. El titanio también emite iones negativos para lograr un secado más rápido y mantener el balance hídrico del cabello. El secador Tourmaline Titanium dejará su cabello suave y sedoso mientras eliminará el frizz.

## GUÍA PARA UN SÚPER PEINADO

### ANTES DE CADA USO

Este aparato está dotado de un cortacircuito de seguridad llamado ALCI (Appliance Leakage Circuit Interrupter), que apaga el aparato inmediatamente si éste cayera al agua. Haga la prueba siguiente para asegurarse que el sistema de detección de agua funcione correctamente:

### FUNDAMENTOS DEL SECADO

1. Lave y acondicione su cabello con los productos deseados. Enjuáguelo bien y séquelo con una toalla para eliminar el exceso de agua. Divida el cabello en secciones. Seque el cabello usando simultáneamente el secador y un cepillo. Coloque el cepillo debajo de cada sección de cabello y dirija el flujo de aire caliente hacia la parte superior del cabello. Mueva el cepillo y el secador lenta y simultáneamente hasta las puntas, dirigiendo el flujo de aire hacia el cabello, no hacia el cuero cabelludo.

2. Mantenga las entradas de aire del aparato sin obstrucciones y libres de pelo.

3. Para no lastimar el cabello, no concentre el flujo de aire en una sección solamente.

4. Para realizar retoques rápidos entre lavados, rocíe un poco de agua sobre el cabello antes de secarlo.

5. Si el aparato cayera al agua, es muy importante que lo mande a un centro de servicio autorizado. No intente reajustarlo.

6. Cuando use el secador para crear bucles y ondas, seque el cabello casi por completo usando un ajuste de temperatura bajo, luego fije el peinado usando el disparo de aire frío. Esto reducirá aún más la electricidad estática y agregará brillo, para un acabado perfecto.

7. Este secador incluye una boquilla concentradora de aire. Utilice la boquilla concentradora cuando necesite secar rápidamente una sección pequeña, como una onda o para alisar el cabello.

### ONDULADO

Para crear ondas despeinadas de apariencia natural, estruje las raíces con los dedos mientras seca el cabello.

### ALISADO

Para alisar el cabello, estire cada sección con un cepillo redondo grande de aproximadamente 5 cm de diámetro. Doble un poco las puntas hacia abajo mientras seca.

### DIFUSOR

Para difundir el aire, coloque la boquilla difusora en la punta del secador y dirija el flujo de aire hacia el cuero cabelludo.

### INTERRUPTORES

Los interruptores de circuito están diseñados para proteger su secador de daños.

### INTERRUPTORES DE CIRCUITO

Este secador incluye un sistema de seguridad que apaga el secador si se detecta agua en el interior.

### INTERRUPTORES DE VOLTAJE

Este secador incluye un sistema de seguridad que apaga el secador si se detecta agua en el interior.

### INTERRUPTORES DE CALOR/VELOCIDAD

Este secador incluye un sistema de seguridad que apaga el secador si se detecta agua en el interior.

### INTERRUPTORES DE ALTA VELOCIDAD

Este secador incluye un sistema de seguridad que apaga el secador si se detecta agua en el interior.

## OPERACIÓN 110-125 VOLTIOS

La mejor apariencia empieza por un recorte de cabello bien mantenido. Siempre cuide su cabello con champús, acondicionadores y productos de belleza. El titanio emite calor infrarrojo lejano que penetra profundamente en el tallo del pelo para secar el cabello desde adentro, sin lastimarlo. El titanio también emite iones negativos para lograr un secado más rápido y mantener el balance hídrico del cabello. El secador Tourmaline Titanium dejará su cabello suave y sedoso mientras eliminará el frizz.

## OPERACIÓN 220-250 VOLTIOS

Asegúrese que el aparato esté apagado. Ponga el selector de voltaje en la posición "250". El aparato funcionará con todos los ajustes de calor y de velocidad: calor y velocidad bajos (LO) y calor y velocidad altos (HI).

## OPERACIÓN 220-250 VOLTIOS

Asegúrese que el aparato esté apagado. Ponga el selector de voltaje en la posición "250". El aparato funcionará con todos los ajustes de calor y de velocidad: calor y velocidad bajos (LO) y calor y velocidad altos (HI).

## OPERACIÓN 220-250 VOLTIOS

Asegúrese que el aparato esté apagado. Ponga el selector de voltaje en la posición "250". El aparato funcionará con todos los ajustes de calor y de velocidad: calor y velocidad bajos (LO) y calor y velocidad altos (HI).

## OPERACIÓN 220-250 VOLTIOS

Asegúrese que el aparato esté apagado. Ponga el selector de voltaje en la posición "250". El aparato funcionará con todos los ajustes de calor y de velocidad: calor y velocidad bajos (LO) y calor y velocidad altos (HI).

## OPERACIÓN 220-250 VOLTIOS

Asegúrese que el aparato esté apagado. Ponga el selector de voltaje en la posición "250". El aparato funcionará con todos los ajustes de calor y de velocidad: calor y velocidad bajos (LO) y calor y velocidad altos (HI).

## OPERACIÓN 220-250 VOLTIOS

Asegúrese que el aparato esté apagado. Ponga el selector de voltaje en la posición "250". El aparato funcionará con todos los ajustes de calor y de velocidad: calor y velocidad bajos (LO) y calor y velocidad altos (HI).

## OPERACIÓN 220-250 VOLTIOS

Asegúrese que el aparato esté apagado. Ponga el selector de voltaje en la posición "250". El aparato funcionará con todos los ajustes de calor y de velocidad: calor y velocidad bajos (LO) y calor y velocidad altos (HI).

## OPERACIÓN 220-250 VOLTIOS

Asegúrese que el aparato esté apagado. Ponga el selector de voltaje en la posición "250". El aparato funcionará con todos los ajustes de calor y de velocidad: calor y velocidad bajos (LO) y calor y velocidad altos (HI).

## OPERACIÓN 220-250 VOLTIOS

Asegúrese que el aparato esté apagado. Ponga el selector de voltaje en la posición "250". El aparato funcionará con todos los ajustes de calor y de velocidad: calor y velocidad bajos (LO) y calor y velocidad altos (HI).

## OPERACIÓN 220-250 VOLTIOS

## PRECAUCIÓN

**ESTE APARATO FUE DISEÑADO EXCLUSIVAMENTE PARA LOS PELUQUEROS PROFESIONALES**

## FAMILIARÍCESE CON SU SECADOR

### Modelo BABTT053T

Rejilla de turmalina y titanio

Filtro extraíble con soporte incorporado

Mango plegable

2 ajustes de calor/velocidad
